Internet Society

Internet Society

Founded in 1992 as an International non-profit organization with a cause to work for the open development and evolution of the Internet for all people.

"The Internet is for everyone"

- Organisational home for
   Internet Engineering Task Force (IETF)
   Internet Research Task Force (IRTF)
   Internet Architecture Board (IAB)

Global Presence

The Internet Society – how we work

In 2015 – We are concentrating on

• Facilitate and promote global, regional and local policy environments that enable the continuing evolution of an open Internet

• Increase the global relevance and recognition of collaborative, bottom-up technical, consensus-based open standards of development in order to protect permissionless innovation for the availability of the open Internet for current and future users

• Increase development and use of security and resiliency technologies and best practices, shape the evolution of online identity infrastructures, and improve choice and consent in the handling of user data

• Provide equal development opportunities for all people by promoting the relevance, deployment, and adoption of the open Internet

Global Internet Report 2015

- Organization's second annual report on the global state of the Internet.
- Focused on the impact of the mobile Internet

Report Highlights:

- 94% of the global population is covered by a mobile network

- More than 80% of online time on mobile is spent on apps, as opposed to a browser.

- Gap between availability and adoption of mobile Internet is due to affordability

 and lack of relevant content.

MANRS [Mutually Agreed Norms for Routing Security]

- How can we work together to improve the security and resilience of the global routing system?
- An initiative that includes a set of actionable recommendations, aims at supporting a secure and resilient Internet.
- Several initial participants have already **publicly committed** to this Manifesto initiative and **implemented** the measures defined in the MANRS document.

ISOC in Asia-Pacific

The Numbers

- **Individual Global Members***
  - 24,300+ (~31%)

- **Chapters**
  - 20 (~19%)

- **Chapter Members**
  - 15,800+ (~30%)

- **Organisation Members**
  - 20 (~14%)

Data as of Aug 2015

Regional Office

- **Singapore**
  - Operational December 2011

- **Staff and Advisors**
  - Rajnesh Singh (Sydney / Singapore)
  - Olivia Loy (Singapore)
  - Amelia Yeo (Singapore)
  - Duangthip Chomprang (Bangkok)
  - Naveed Haq (Islamabad)
  - Noelle Guzman (Manila)

Internet Society™

Regional Policy Survey 2015

-   Our second regional survey on topical Internet policy issues.
-   Polled 3,302 end-users from across the region.
-   Focused on stakeholder perceptions towards Internet policymaking and policy issues specifically Internet connectivity and cybersecurity.

Survey Highlights:

-   Internet connectivity again emerged as the topmost concern for respondents

-   87% of respondents would like their government to provide more opportunities for them to be involved in Internet policymaking

-   90% believed that policymakers in their country need a better understanding of Internet issues

-   70% believed that cybersecurity and civil liberties are equally important
